

Cloud Computing Services

TOTAL POINTS 2

1. Does a cloud computing service let you scale your resource use up and down?

1 / 1 point

- ☒ Yes
- ☐ No

Correct

That is correct. The cloud provider has a pool of resources and lets you use more or less on demand.

2. To get resources from a cloud computing provider, is working with a person at the provider required?

1 / 1 point

- ☐ Yes
- ☒ No

Correct

That is correct. Cloud computing resources are available on-demand and self-service. (An exception: cloud computing providers typically set some limits on the amount of resources a customer can consume by default, to help customers avoid accidental runaway resource usage and charges. These limits can be raised by the cloud provider.)
