

# Kubernetes Engine

TOTAL POINTS 2

1. Where do the resources used to build Kubernetes Engine clusters come from?

1 / 1 point

- ☐ Bare-metal servers
- ☐ App Engine
- ☒ Compute Engine

✓ **Correct**

Correct! Because the resources used to build Kubernetes Engine clusters come from Compute Engine, Kubernetes Engine gets to take advantage of Compute Engine's and Google VPC's capabilities.

2. True or false: Google keeps Kubernetes Engine refreshed with successive versions of Kubernetes.

1 / 1 point

- ☒ True.
- ☐ False.

✓ **Correct**

That's correct! The Kubernetes Engine team periodically performs automatic upgrades of your cluster master to newer stable versions of Kubernetes, and you can enable automatic node upgrades too.
