Containers

TOTAL POINTS 2

1. True or false: each container has its own instance of an operating system.

1 / 1 point

☐ True

☒ False.

Correct

Correct! Containers start much faster than virtual machines and use fewer resources, because each container does not have its own instance of the operating system.

2. Containers are loosely coupled to their environments. What does that mean? Choose all the statements that are true. (3 correct answers)

1 / 1 point

☐ Containers don't require any particular runtime binary.

☒ Containers are easy to move around.

2. Containers are loosely coupled to their environments. What does that mean? Choose all the statements that are true. (3 correct answers)

1 / 1 point

☐ Containers don't require any particular runtime binary.

☒ Containers are easy to move around.

✓ **Correct**
Correct!

☐ Containers package your application into equally sized components.

☒ Deploying a containerized application consumes less resources and is less error-prone than deploying an application in virtual machines.

✓ **Correct**
Correct!

☒ Containers abstract away unimportant details of their environments.

✓ **Correct**
Correct!
